## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 21 November 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1, drawn to the tissue press, classified in class 100, subclass 116.
- II. Claims 62-102, drawn to a method of using a surgical implant material, classified in class 623, subclass 13.12.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case the apparatus is not an obvious one for making the product and it can be used to make a different product such as pressed plant (e.g. fruit) tissue products in the making of edible foods.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

If the method (Group II) is selected for prosecution, then Applicant is also required to make a species election from the requirement made below.

This application contains claims directed to the following patentably distinct species of the claimed invention. There are three categories of species. Applicant is

Art Unit: 3738

required to select one species from each category and then set forth which claims read on the elected combination of species.

**Macrostructure species (category 1)**

- |                              |                                   |
|------------------------------|-----------------------------------|
| a.) Wedge (claims 72 and 93) | f.) Intramedullary rod (claim 77) |
| b.) Screw (claim 73)         | g.) Acetabular cup (claim 79)     |
| c.) Rivet (claim 74)         | h.) Sleeve (claim 80)             |
| d.) Ring (claim 75)          | i.) Sheet (claim 82)              |
| e. Spacer (claim 76)         | j.) Joint replacement (claim 78). |

**Component species (category 2)**

- 1.) Tendon tissue (claim 84)
- 2.) Blood component (claim 86)
- 3.) Bone tissue
- 4.) Biodegradable material
- 5.) Growth enhancer
- 6.) Liver cells
- 7.) Pancreas cells

**Method of using species (category 3)**

- I. Fastener method
- II. Tendon replacement (claim 84)
- III. Ligament replacement (claim 85).

Art Unit: 3738

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 62 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Due to the complex nature of the restriction requirement, a telephone call was not made to the Applicant, and the Examiner elected to mail out the restriction requirement instead.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).

**Conclusion**

Applicant should specifically point out the support for any amendments made to the disclosure, including the claims (MPEP 714.02 and 2163.06). Due to the procedure outlined in MPEP 2163.06 for interpreting claims, it is noted that other art may be applicable under 35 USC 102 or 35 USC 103(a) once the aforementioned issue(s) is/are addressed.

Applicant is respectfully requested to provide a list of all copending applications that set forth similar subject matter to the present claims. A copy of such copending claims is respectfully requested in response to this Office action.
